

NAUMAN TARIQ

AI ENGINEER — AGENTIC AI & FULL STACK DEVELOPMENT

+92 303 9589929 | aiengineernaumantariq@gmail.com | Faisalabad, Punjab, Pakistan

PROFILE

Final-year Software Engineering student specializing in Agentic AI, with hands-on experience building full-stack applications and AI-powered systems. Skilled in designing RAG pipelines, autonomous agents, and workflow automation using LangChain, LangGraph, and n8n, combined with strong backend (FastAPI) and frontend (React) development capabilities. Passionate about building practical, production-ready AI solutions.

SKILLS

Frontend: HTML, CSS, JavaScript, React

Backend: Python, FastAPI

Database: PostgreSQL, MongoDB, Vector Databases (ChromaDB)

Machine Learning: Basics of ML & Deep Learning

Agentic AI: LangChain, LangGraph, RAG (Retrieval-Augmented Generation), AI Agents, n8n

PROJECTS

Full-Stack Attendance Management System

Personal Project

- Built a role-based (Admin / Teacher / Student) attendance system with a FastAPI backend and PostgreSQL (Neon) database.
- Implemented core attendance workflows including auto-assignment logic and feedback tracking; deployed a live web version.

AI-Skin-Specialist Doctor

Personal Project

- Developed a multimodal AI agent that analyzes skin conditions from uploaded images and general symptoms through voice/text queries, using tool calling to fetch real-time guidance from trusted medical sources.
- Applied Agentic AI concepts (multimodal reasoning, autonomous tool calling, structured urgency-based decision making) with emergency red-flag guardrails, built on FastAPI and integrated with Groq, MiniMax, and Deepgram.

EDUCATION

BS Software Engineering — Final Year (7th Semester)

2023 – 2027

Government Graduate College Samanabad, Faisalabad
